Santa Clara, Calif., 6th June 2011:

IntelliCorp Teams with IBM to expand SAP Solution Manager Capabilities

Extract SAP® Solution Manager content for use in IBM Rational Enterprise Architecture and IT Planning Solutions.

WHO/WHAT: IntelliCorp, a worldwide provider of application lifecycle management, business process and data management software for SAP users, today announced that it has teamed with IBM to establish an enhanced reseller agreement for its LiveCapture for SAP Solution Manager on the IBM Rational Software platform. IBM will resell and support the LiveCapture for SAP Solution Manager Software product. When coupled with Rational System Architect, IBM customers will be able to easily harvest company specific business process content held in SAP Solution Manager into an enterprise planning environment. The combined solution allows IBM customers, who are implementing SAP, an enterprise transformation platform that improves overall alignment from business strategy and process to organization information and existing IT infrastructure.

“IntelliCorp’s LiveCapture for SAP Solution Manager is a natural match for use with IBM’s Rational System Architect,” said Jerome Klajbor, IntelliCorp’s CEO. “Combined, the two products provide invaluable insight into how enterprise architecture translates into business processes that are supported by SAP applications.

"Large investments by SAP customers are often made to enable a vital business transformation with impacts that ripple across the organization,” said Michael Loria, Vice President, Business Development, IBM Rational Software. “By integrating IntelliCorp LiveCapture for SAP Solution Manager with Rational System Architect, IBM is able to

provide our customers with a reliable enterprise architecture platform that guides transformation decisions with maximum return.”

“IntelliCorp is committed to working with IBM to extend the use of IntelliCorp’s best-of-breed SAP technology into System Architect and beyond,” explained Christopher Trueman, IntelliCorp CTO. “The benefits for users are clear: a unified product set that lets organizations scale to a meaningful enterprise architecture in a seamless manner.”

IntelliCorp will showcase LiveCapture for SAP Solution Manager with demos and technical presentations at booth #120 during IBM Innovate June 5-9, in Orlando.

WHEN: 6th June 2011

WHERE: Orlando, FL.
